FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every census year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

EXPLANATORY TEXT

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

EXPLANATORY TEXT

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

EXPLANATORY TEXT

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I – POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

EXPLANATORY TEXT

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

EXPLANATORY TEXT

- or within one year, if abroad;
 - b. students who usually go home to their respective households at least once a week;
 - c. persons working elsewhere who usually go home to their respective households at least once a week;
 - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
 - e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
 - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
 - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
 7. Persons found in the household who have no usual place of residence elsewhere;
 8. Persons found in the household who are not certain of being enumerated elsewhere;
 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

EXPLANATORY TEXT

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancery or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

EXPLANATORY TEXT

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse — a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter — the head's own child, stepchild, or adopted child.

EXPLANATORY TEXT

3. Son-in-law/daughter-in-law - refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter - child of the son or daughter of the head.
5. Other relative - a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
6. Others - any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single - If never been married.
- b. Married - Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed - A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated - If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced - If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown - If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II - HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesorias, condominium) that was vacant;

EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

1. **Single house** – a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
2. **Duplex** – a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
3. **Apartment/accesoria/condominium/row house**

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

4. **Improvised (barong-barong)** – a makeshift or roughly constructed house usually built with salvaged materials.
5. **Commercial/industrial/agricultural** – buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. **Other housing unit (natural shelter, boat, etc.)**

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

7. **Hotel, lodging house, dormitory, etc.** – This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
8. **Institutional (hospital/convent/school dormitory/penal institution, etc.)** – a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
9. **Other collective living quarters** – any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

EXPLANATORY TEXT

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

EXPLANATORY TEXT

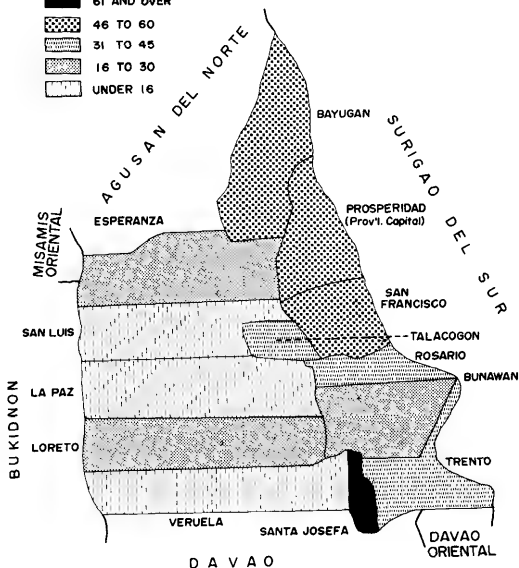

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

Agusan del Sur: A Brief Analysis

The history of Agusan del Sur is closely linked with that of its sister province, Agusan del Norte, since both were once part of Surigao and later of Agusan, until their creation as separate provinces in June 17, 1967 under Republic Act No. 4979.

The province lies in the northeastern portion of Mindanao, bounded by Agusan del Norte on the north, Davao and Davao Oriental on the south, Surigao del Sur on the east, and Bukidnon and Misamis Oriental on the west. It is accessible from Davao in the south and Agusan del Norte in the north via the Daang Maharlika.

Agusan del Sur is an elongated basin formation with mountain ranges in the north, east and west, thus forming a valley which occupies the central longitudinal section of the province.

Considered the fourth biggest province in the country, Agusan del Sur occupies a land area of 8,965.5 square kilometers, representing 3.0 percent of the total land area of the Philippines.

Thirteen municipalities compose the province with Prosperidad as its capital.

POPULATION

As registered in the 1980 census, Agusan del Sur had 265,030 inhabitants of which 137,222 were males and 127,808 were females. The population figure put the annual geometric growth rate at 4.45 percent, showing an upward trend of the growth rate registered between 1970 and 1975 (4.08%). Correspondingly, the population density went up from 23.8 in 1975 to 29.6, or an increase of 5.8 persons per square kilometer over a five-year period.

A slow rural to urban movement was noted in the province within the past five years. A little more than four-fifths (80.62%) of the population still reside in the rural areas and only 19.38 percent, in the urban areas although the 1980 proportion of urban population is 3.97 percentage points higher than the 1975 figure. However, it is encouraging to observe that the proportion of rural population has gone down between 1975 (84.59%) and 1980 (80.62%).

A comparative breakdown of the population classified according to urban-rural residence and sex is shown in Table A.

A BRIEF ANALYSIS

The sex ratio (number of males for every 100 females) of the province dropped from 109.54 in 1975 to 107.37 in 1980. The sex ratio in the rural areas (108.37) was higher than that in the urban areas (103.29). In both areas, the males outnumbered the females.

Table 2 provides a picture of the distribution of the population by five-year age groups. It will be noted that in both the rural and urban areas a large proportion of the male and female population are under 5 years of age. From this age group to the 80 years old and above, the population (male and female) respectively decreases as each age group grows older, thus a pyramid-like structure can be seen with the broad base of each formed by the under 5 years of age and the apex, by the 80 and above.

AGE COMPOSITION

The province has a high proportion of the younger age group (0-14 years) although a downward trend has been observed since 1970. The youth population comprises 47.43 percent of the provincial total, or a decrease of 1.40 percentage points between 1975 and 1980, higher than the 1970-1975 decline of 0.88 percentage point. The productive age group (15-64 years), on the other hand, indicates an upward trend. After increasing 0.97 percentage point between 1970 and 1975, the productive age group went up slightly to 50.80 percent. The older age group (65 years and over) comprises a small proportion of the provincial population (1.77%), showing a very meager increase of 0.55 percentage point between 1975 and 1980.

Below are comparative figures showing the age composition of the population in three censal years:

**TABLE B — AGE COMPOSITION OF THE POPULATION,
AGUSAN DEL SUR: 1970, 1975 AND 1980**

65 years and over	4,697	1.77	2,590	1.22	2,285	1.31

The median age of the population is 16 years; half of the population are below 16 years old and the other half, above this age. The slight increase in the proportion of persons 15-64 years old precipitated an increase in the median age of the population — from 15 years in 1975 to 16 years in 1980 or a difference of 1 year between 1975 and 1980, showing that the population of Agusan del Sur is growing older.

The preceding table on age distribution shows that 49.20 percent of the population belong to the "dependent" population compared to 51.02 percent in 1970 and 50.05 percent in 1975. With the increased percentage of persons in the working or productive ages, the dependency ratio (number of dependents for every 100 persons in the productive age group) was a little lower in 1980 than it was a decade ago. The dependency ratio dropped

A BRIEF ANALYSIS

from 104.16 in 1970 to 100.19 in 1975 and went down to 96.84 in 1980. However, urban dependency ratio (93.44) was lower than the rural ratio (97.67).

MARITAL STATUS

For the past three censuses, married persons consistently held the highest proportion of the population 10 years old and over – 51.54 percent in 1970, 50.75 percent in 1975 and 53.72 percent in 1980. Never married persons at 43.17 percent, declined 4.11 percentage points, from 47.28 percent in 1975. Meanwhile, widowed persons increased 0.94 percentage point to 2.66 percent in 1980. Slight increases are also observed for the divorced or separated (0.14 percentage point) and persons with unknown marital status (0.06 percentage point).

More than one-half of the urban and rural population 10 years old and over were married (51.85% and 54.18%, respectively). Never married persons constituted 45.34 percent in the urban areas while their rural counterparts made up 42.64 percent.

Less than half (46.13%) of the total male population 10 years old and over were never married, 3.88 percentage points lower than the 1975 proportion (50.01%). Consequently, the proportion of married males increased from 48.65 percent in 1975 to 51.84 percent in 1980. The proportion of widowed males also increased by 0.53 percentage point while the

divorced or separated gained 0.12 percentage point. Among the females, 39.95 percent were never married, following a 4.28 percentage-point decrease. However, married females increased from 53.09 percent to 55.78 percent. Likewise, widowed and divorced or separated females, respectively, increased by 1.36 and 0.16 percentage points (Table 4).

HIGHEST GRADE COMPLETED

Of the private household population 7 years old and over, persons with an elementary education maintained a marked predominance over those in the other categories, but dropped from 67.85 percent in 1975 to 65.37 percent in 1980. On the other hand, those who reached the high school level considerably increased from 14.30 percent to 18.57 percent. A similar trend is likewise noted in the proportion of persons with college education, which increased by 1.77 percentage points. Academic degree holders increased by a mere 0.44 percentage point to 1.47 percent. Meanwhile, the number of persons without formal education and persons whose educational attainment were unknown, respectively decreased by 3.32 percentage points and 0.68 percentage point.

Of those who had elementary education, only 28.80 percent graduated from the sixth or seventh grade. More than one-third (36.43%) did not go beyond the first to third grade; 20.03 percent attained the fourth grade and 14.74 percent, the fifth grade. Of those with secondary education, 71.16 percent reached anywhere from the first to third year while

A BRIEF ANALYSIS

28.84 percent finished fourth year. Majority of the college undergraduates (84.28%) finished the first to third year and only 15.72 percent completed the fourth or higher year (Table 5).

The distribution of the private household population 7 years old and over according to highest grade completed is shown in the accompanying table:

A BRIEF ANALYSIS

LITERACY

The literacy rate for all private household population 10 years old and over was 78.37 percent. Overall, the literacy rate was higher among females (79.20%) than among males (77.61%). The differences in literacy rate existed in both urban and rural areas; this may be attributed to more schools and greater accessibility in urban areas. Urban female literacy rate was 88.07 percent compared with the males' 85.99 percent. The corresponding figures in the rural areas were 76.93 percent and 75.63 percent.

FIG. 4 - PERCENTAGE LITERACY OF PRIVATE HOUSEHOLD POPULATION 10 YEARS OLD AND OVER BY SEX, URBAN-RURAL, AGUSAN DEL SUR: 1980

LANGUAGE OR DIALECT

More than 28 dialects and languages are reported spoken in the different municipalities of the province; however, only one stands out as the dialect spoken by most of the households. Of the 46,022 private households in the province, 73.95 percent speak Cebuano; 12.44 percent, Manobo; 7.30 percent, Hiligaynon (Ilongo); 1.92 percent, Ilocano; 1.06 percent, Lineyte-Samarnon (Waray) and the rest, one of several other languages or dialects reported for the province.

It is interesting to note that the Manobo dialect spoken by the natives of Bukidnon is also spoken by some households in all the municipalities of Agusan del Sur, showing that the Manobo tribe is well integrated in the province (Table 7).

A BRIEF ANALYSIS

GAINFUL OCCUPATION

As seen in Table 8, gainful workers compose only 49.69 percent of the private household population 15 years old and over; the remaining 50.31 percent are in non-gainful activities.

The number of gainful workers has increased to 69,133 from 57,793 in 1975 and 58,084 in 1970. The province is basically agricultural. Over three-fourths (78.17%) of the total gainful workers are agricultural, animal husbandry and forestry workers, fishermen and hunters. However, the proportion decreased by 6.17 percentage points from 84.34 percent in 1975, which may be attributed to increases in the proportion of workers in the other gainful occupation groups. Trailing far behind are production and related workers, transport equipment operators and laborers, accounting for 8.02 percent, 2.42 percentage points higher than the previous proportion. Service workers comprise 3.91 percent; sales workers, 3.32 percent; professional, technical and related workers, another 3.32 percent and clerical and related workers, 1.86 percent. Administrative, executive and managerial workers continuously decreased from 0.56 percent in 1970 to 0.37 percent in 1975 and 0.31 percent in 1980.

Nearly four-fifths (79.94%) of the total gainful workers come from the rural areas with the urban areas contributing 20.06 percent. This is attributable to the fact that the biggest proportion of gainful workers are agricultural, animal husbandry and forestry workers, fishermen and hunters, majority of whom are rural-based (86.68% of agricultural workers).

Changes in the proportion of workers engaged in various occupations from 1970 to 1980 are shown in the following table:

A BRIEF ANALYSIS

**FIG. 5 — GAINFUL WORKERS 15 YEARS OLD AND OVER
BY MAJOR OCCUPATION GROUP, AGUSAN DEL SUR: 1980**

INDUSTRY

Agriculture, fishery and forestry, the dominant industry group in the province, provide means of livelihood to more than four-fifths (80.81%) of the total gainful workers 15 years old and over. Most of the agricultural workers derive their income from agricultural crop production (93.23%) and less than one-tenth (6.07%) from forestry. Community, social and personal services comprise 8.70 percent of the total gainful workers; wholesale and retail trade, 3.45 percent; manufacturing, 1.95 percent; transportation, storage and communication, 1.86 percent; construction, 1.12 percent and financing, insurance, real estate and business services, 0.68 percent. Mining and quarrying, and electricity, gas and water constitute only 0.07 percent and 0.33 percent, respectively, and activities not adequately defined, 1.03 percent.

A BRIEF ANALYSIS

MIGRATION

Out of 216,360 persons 5 years old and over, 88.24 percent are residents of the same municipality where they had lived on May 1, 1975. Of the 25,437 persons or 11.76 percent who changed residence on May 1, 1975, 2.45 percent moved to another municipality within the province (intra-provincial migrants) while 9.20 percent moved to another province (inter-provincial migrants). Only a small percentage of the population were residents of foreign countries (0.11%). In the intra-provincial as well as inter-provincial movements the males outnumbered the females. Among migrants from foreign countries, however, the females surpassed the males (Table 10).

Type of Building

A great majority (95.48%) of the 46,022 households of Agusan del Sur are occupying single houses. The rest live in duplex (1.28%); apartment/accesoria/condominium/row house, etc. (0.16%); improvised structures such as barong-barong (1.96%); commercial/industrial/agricultural buildings (0.37%); other housing unit such as natural shelter, boat, etc. (0.57%); hotel, lodging house, dormitory, etc. (0.01%); institutional buildings such as hospital, convent, school dormitory, etc. (0.02%) and other collective living quarters like military camp, etc. (0.15%).

A BRIEF ANALYSIS

Occupants of single houses are found mostly in the rural areas (82.21%) while only 17.79 percent are in the urban areas. In contrast more households living in duplex structures are urban (72.08%) than rural residents (27.92%). Likewise, a bigger proportion of households occupying commercial/industrial/agricultural buildings are in the urban (78.57%) than in the rural areas (21.43%). Households living in improvised dwelling units are more concentrated in the rural (85.07%) than in the urban areas (14.93%). Similarly, a higher proportion of households in apartment/accesoria/condominium, etc. are found in the rural (59.46%) than in the urban areas (40.54%).

The following table presents a picture of the housing conditions in Agusan del Sur in two censal years:

TYPE OF OCCUPANCY

Of the 46,022 households in Agusan del Sur, 86.13 percent or 39,637 households are owners of their dwelling units. The rest of the households are distributed as follows: tenant/lessee, 5.79 percent; subtenant/sublessee, 0.21 percent and rent-free occupants, 7.87 percent.

More than four-fifths (81.99%) of the owner-occupants are in the rural areas and only 18.01 percent are in the urban areas (Table 1).

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Of the total households in the province, 61.63 percent are residing in dwelling units constructed with roof of cogon or nipa and 20.64 percent, in units with roof of galvanized

A BRIEF ANALYSIS

iron or aluminum. Households occupying units with roof of other materials (anahaw, etc.) make up 13.65 percent; of makeshift or salvaged materials, 3.55 percent; and of tile, concrete, brick, stone and asbestos, 0.53 percent. A large proportion of the urban (62.32%) as well as the rural households (61.47%) reside in units with roof of cogon or nipa. However, the proportion of households living in units with roof of galvanized iron or aluminum is higher in urban (33.10%) than in rural areas (17.73%).

By type of construction materials of outer walls, 75.33 percent of the households dwell in units built with walls of wood or plywood and 11.31 percent, of bamboo or sawali. A small percentage occupy units with outer walls of other materials (4.44%); of mixed tile, concrete, brick, stone and wood or plywood (3.50%); makeshift or salvaged materials (2.30%) and cogon or nipa (2.19%). Very few households live in units with outer walls of tile, concrete, brick, or stone (0.44%), galvanized iron or aluminum (0.39%) and asbestos (0.10%).

Most of the households in both the urban (68.88%) and the rural areas (76.84%) occupy dwelling units built with outer walls of wood or plywood. Households in dwelling units built with walls of bamboo or sawali comprise 10.37 percent in the urban areas and 11.53 percent in the rural areas (Table 2).

YEAR BUILT

Majority of the households (66.27%) are occupants of structures built in 1976-1980; 21.15 percent, in 1971-1975; 10.51 percent, 1961-1970; 1.92 percent, 1951-1960 and only 0.15 percent, 1942-1950. No household was reported occupying any building built in 1941 or earlier (Table 2).

FLOOR AREA OF DWELLING UNIT

Almost two-thirds or 66.33 percent of the total households occupy dwelling units with floor area less than 30 square meters; 25.00 percent live in 30-49 square-meter dwelling units; 3.15 percent, in 50-69 square-meter units; 2.32 percent, in dwelling units of 70-99 square meters and 1.84 percent, of 100-149 square meters. Only 1.36 percent have more spacious dwelling units with floor area of 150 square meters and over (Table 3).

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 39,637 households that own their dwelling units, 79.88 percent also own the land where the structures are erected. The rest are distributed as follows: 4.84 percent, lessee/sublessee; 5.21 percent, farm lessee/agricultural tenant of landowner; 3.25 percent, other legal tenure and 6.82 percent, no tenure such as squatters (Table 4).

SOURCE AND USE OF WATER SUPPLY

As observed in Table 6, dug well is the most common source of water supply for households in the province for drinking (38.65%) and for kitchen use (36.37%); however, only 18.55 percent depend on this source for washing clothes. A good proportion of the households depend on spring as their source of water supply for drinking (22.72%) and for kitchen use (18.83%) while 9.43 percent utilize it for washing clothes. Tubed or piped deep well and shallow well are utilized by 9.99 percent and 9.64 percent, respectively, for drinking; 9.19 percent and 8.85 percent use these sources for kitchen use and 6.84 percent and 4.61 percent, respectively, for washing clothes. The faucet, community water system is utilized by 7.96 percent for drinking, 7.34 percent for kitchen use and 4.38

A BRIEF ANALYSIS

percent for washing clothes. Water from lake, river, stream, etc. is used by only 4.01 percent for drinking and 17.22 percent for kitchen use. For washing clothes, however, more than one-half (55.29%) of the total households depend on lake, river, stream, etc. Although rain water is used for drinking by 7.03 percent, only 2.20 percent utilize it for kitchen use and 0.90 percent, for washing clothes (Table 6).

KIND OF LIGHTING FACILITIES

A large percentage of the households (86.95%) still use kerosene for lighting. Only 7.12 percent use electricity; 4.18 percent, liquefied petroleum gas (LPG); 0.20 percent, oil and 1.55 percent, other kinds of lighting facilities. Of the urban households, 83.53 percent use kerosene; 10.69 percent, electricity and 5.38 percent, LPG. Likewise, majority of the rural households (87.74%) use kerosene; 6.29 percent, electricity; 3.90 percent, LPG; 0.18 percent, oil and 1.89 percent, other (Table 5).

COOKING FUEL

Wood or charcoal is the most common type of cooking fuel in the province, with 41,634 households or 90.46 percent using it. Less than one-tenth, or 7.58 percent of the total households use kerosene; 0.74 percent, liquefied petroleum gas (LPG); 0.89 percent, others and only 0.33 percent, electricity.

In both urban and rural areas, wood or charcoal is used by majority of the households — 88.20 percent for the former; 91.00 percent for the latter. Kerosene is used by 10.08 percent of the urban households compared to 7.00 percent of the rural households. A higher proportion of households in rural areas (0.36%) use electricity compared to 0.17 percent in the urban areas. However, liquefied petroleum gas is used by 1.32 percent of the urban households and only 0.60 percent of the rural households (Table 8).

TOILET FACILITIES

Nearly one-third (32.62%) of the total households in Agusan del Sur use the water-sealed with other depository and 11.06 percent, the water-sealed with sewer or septic tank types of toilet facilities. The closed pit (antipolo, etc.) is used by 24.12 percent; open pit, 12.19 percent and other types (pail system, etc.), 1.48 percent. A considerable number (18.53%) lack toilet facilities. The water-sealed with other depository type is common among urban (44.73%) and rural households (29.79%). However, the water-sealed with sewer or septic tank type is used by a higher proportion of urban (22.06%) than rural households (8.50%). Over one-fourth, or 26.18 percent of the households in rural areas use the closed pit and 13.87 percent, the open pit. The corresponding figures for urban areas are 15.27 percent and 5.01 percent. Other types of toilet facilities are used by a few households — 0.30 percent for urban and 1.75 percent for rural areas. In both areas a high percentage of the households are without toilet facilities — 12.63 percent and 19.91 percent, respectively (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

More than one-half (53.17%) of the total number of households own radios; only 0.28 percent have television sets and 1.92 percent, refrigerators or freezers. Comparatively, the proportion of households with radio is higher in urban (58.91%) than in rural areas (51.83%). Owners of television sets constitute 0.57 percent of the urban and 0.22 percent of the rural households. Meanwhile, households with refrigerators or freezers comprise 4.14 percent in the urban and only 1.40 percent in the rural areas (Table 9).
